

Brainstorming & Idea Prioritization Template

Date	04 July 2026
Team ID	XXXXXX
Project Name	Credit Card Approval Prediction
Maximum Marks	3 Marks

Step 1: Brainstorm and Idea Listing

Each team member lists out as many ideas as possible without judging them at this stage.

S.No	Team Member	Idea / Suggestion	Category
1	B.Telesh swamy reddy	Use traditional data (Credit history, Income, Debt, Employment) + Apply SMOTE to fix dataset imbalance (since rejections are usually rare).	Data & Preprocessing
2	B.Telesh swamy reddy	Experiment with alternative data like automated risk scoring from transaction behavior or utility history if available.	Data Strategy
3	B.Telesh swamy reddy	Train and benchmark tree-based machine learning models (Random Forest and XGBoost), which work best for tabular banking data.	Modeling & Algorithms
4	B.Jayasri	Implement SHAP or LIME (Explainable AI) so the model can explain <i>why</i> a customer was approved or denied (crucial for banking compliance).	Model Interpretation
5	B.Jayasri	Evaluate model performance using Recall and ROC-AUC instead of just accuracy (missing a bad debtor costs the bank a lot of money).	Evaluation Metrics

Brainstorming & Idea Prioritization Template

6	B.Jayasri	Evaluate model performance using Recall and ROC-AUC instead of just accuracy (missing a bad debtor costs the bank a lot of money).	Deployment / UI
---	-----------	---	-----------------

Step 2: Idea Prioritization

Rate each grouped idea on feasibility and importance, then select the final idea(s) to move forward with.

Group No.	Final Idea	Feasibility (High/Medium/Low)	Importance (High/Medium/Low)	Priority	Selected (Yes/No)
1	Data Strategy: Stick to standard financial/credit data (clean missing data and handle imbalance with SMOTE). Skip heavy alternative data to save time.	High	High	1	Yes
2	Modeling & Explainability: Train Random Forest/XGBoost models and use SHAP values to explain the model's approval decisions.	Medium	High	2	Yes
3	Evaluation & Deployment: Focus heavily on maximizing Recall for bad loans, and deploy a minimal, functional Streamlit UI for the presentation.	High	Medium	3	Yes
